

BLACKHOLE INFIVERSE — TASK SPECIFICATION

Task Title: AI Video Processing & Subtitle Generation Pipeline

Assignee: Rudra Parmeshwar

Department: Web Development

Priority: High

Generated Date: 18/08/2026

Project Overview:

Build and deploy an automated video processing pipeline that handles raw video upload, frame sampling, AI-driven subtitle extraction, and realtime status notifications.

Key Specifications & Deliverables:

1. Support MP4, MOV, and WebM video formats up to 500MB upload size.
2. Integrate background video ingest queue with task worker nodes.
3. Extract audio stream, execute AI speech-to-text transcript generation, and save subtitles.
4. Store task execution telemetry and notify candidate upon completion.
